Show me all open work orders sorted by priority and age.

Here are all **open work orders**, sorted by **priority** and then **age**. I'm using the open work orders in the property roster and the available aging data in the open work order log; the only explicitly logged open work order is *Pothole Repair*, which has been open **45 days**.[Open Work Orders]

Priority	Work Order	Status	Age	Vendor
Normal	Pothole Repair	open	45d open	No vendor

No other open work orders are listed in the provided open work order log. The property roster does show other open tenant issues indirectly through **COI** and vacancy data, but those are not work orders.[Open Work Orders]
