MONTH DD, YYYY

Executive brief

State the business condition, the operating consequence, and the recommended intervention in one page.

Current state

Document the people, processes, tools, data, constraints, and risks that shape the work today.

Recommended system

Describe the smallest useful system that will reduce friction and produce a measurable operating result.

Scope and deliverables

List included work, exclusions, client responsibilities, acceptance criteria, and handoff artifacts.

Implementation plan

Organize the work through Assess, Design, Install, and Operate. Assign owners, dates, and decision gates.

Investment

State fees, payment timing, assumptions, change-control terms, and ongoing support options.

Next step

Specify one decision and one action required to begin.
