

CYPRESS COMMAND · VISUAL SYSTEM

Ink on paper. One surface, one accent, three signals.

One token set serves the company, the Playbook, Command Platform, and print. Terra is the only page-level accent. Cypress Green is a surface, never a color. Olive, Mustard and Oxblood carry state, never decoration. Color is never ornament: every colored element answers to a role, a state, a level, a chapter, or a risk.

04 TYPOGRAPHY

BESLEY · ARCHIVO · COURIER PRIME — ALL OPEN LICENSES

Build AI into how you actually operate.

Besley 400 carries long-form and print at 17/26. It is a serious editorial serif with enough contrast to feel archival without feeling precious. Headlines set in 900 with tight tracking.

Archivo carries product interfaces, labels, navigation, tags, buttons, and the wordmark. Neutral, wide, mechanically clear at small sizes.

05 MARK AND LOCKUPS

THE 04C MARK · CLOSED FRAME, RIGHT NOTCH, INSET CORE · ONE FLAT FILL, COLOR BY CONTEXT

ink · nav, footer, documents

terra · byline, covers, avatar

paper on Cypress surface

paper on night

horizontal lockup · mark · hairline · Archivo 800 · clear space = frame thickness

byline lockup · "by Cypress Command"

COLORWAYS · ONE FLAT FILL, CHOSEN BY CONTEXT

ink · documents, nav

terra · bylines, covers, avatar

olive · complete / Starter

mustard · in progress / Intermediate

cypress · dark-on-light alternate

night terra on cypress · ≥40 px only

Minimums: mark 20 px / 6 mm · lockup 120 px / 32 mm. The mark is monochrome and takes any single palette token by context — Ink on documents, Terra for bylines and covers, Paper on dark surfaces, Olive or Mustard when it labels a state, Cypress as a dark-on-light alternate. One color per instance; ≥4.5:1 against its ground; never Oxblood, never two-tone, never a gradient. Never rotate, shadow, outline, stretch, or set on photography without a panel. Inside the Playbook: Ink, Terra, Paper only.

07 APPLICATIONS

ONE SYSTEM · MANY SURFACES

Hatched panels mark where photography goes. The imagery rule: real places, real people, real progress — muted daylight photographs of actual sites and work, framed by a hairline. No stock "AI" imagery, no renders passed off as photos.

How This Document Is Illustrated

The Playbook is a *scope* of this system ([data-brand="playbook"]), not a fork. It inherits every token, remaps the brand surface to Ink, and adds level and chapter roles. Rules from the Playbook Brand Kit rev. 2 apply inside it unchanged.

09 BRAND ARCHITECTURE

CYPRESS COMMAND NAMES THE COMPANY AND NOTHING ELSE

operator → builder → practitioner (separate track)

10 RULES

A SMALL SET. BIG DISCIPLINE.

- 01

Terra is the only page-level accent: eyebrows, active nav, links, byline mark, primary CTA.
- 02

Cypress Green is a surface, never a text color. Text on it is Paper; accent on it is night Terra. It never appears in the Playbook. The mark may take it as a dark-on-light fill.
- 03

Olive, Mustard, and Oxblood carry state. They never decorate.
- 04

Oxblood means "do not." Never emphasis, never importance, never a level.
- 05

Never more than one accent ink in view at once; Oxblood may join any of them as risk.
- 06

Paper Deep is a surface, not a color. Objects inside a band return to Paper.
- 07

No shadows. No radius above 2 px on documents, 4 px in product. Hairlines carry structure.
- 08

Besley for display and long-form body; Archivo for UI and labels; Courier Prime for technical content only.
- 09

Night inverts Paper and Ink and lifts the accents to their night values. Hierarchy and roles do not change.
- 10

Orange Ocean, Moss, Amber, Charcoal, and Bone are retired and must not appear.
- 11

Sub-brands are scopes of this token set, never new palettes.
- 12

tokens.css is the single source of truth. Figma, Tailwind, print, and the Playbook consume it.
