

OFFICIAL BRAND KIT

Ink on paper. Systems that hold.

Master identity, product system, stationery, and applications.
Built from the approved boards, tokens, and marks — unstretched.

One master. Named products. No rogue palettes.

01

Cypress Command

Master identity. The operating brand for documents, products, interfaces, and decisions.

02

The AI Playbook

Named product. Illustrated Edition uses Groundwork inks. The mark is recolored into those inks. Cypress Green never appears.

03

Case work

On The Boulevard and Belle Realty may appear as sourced case studies. They do not receive a Cypress palette.

Structure

before decoration

Meaning

before color

Evidence

before claims

Restraint

before novelty

Consistency

before invention

Decision owner: Adam Abdalla. Implementation values live in tokens/tokens.json. Do not hand-edit generated CSS.

Keep the geometry. Terra leads.

HORIZONTAL · PAPER

HORIZONTAL · NIGHT

MARK · PAPER

MARK · NIGHT

Production rules

Clear space: one core-width on every side.

Minimum: horizontal 260 CSS px / 65 mm. Standalone mark 24 px / 12.7 mm.

On photography: sit the mark on a solid Paper or Ink field.

Never distort the C, drop the inner square, rebuild the wordmark from a font, or restore Cypress Green.

Color earns its place.

PAPER	PAPER DEEP	INK	INK SOFT	RULE	TERRA	OLIVE	MUSTARD	OXBLOOD
#F4EFE2	#EAE2CD	#1E1B16	#5C554A	#C9BFA8	#A44E12	#49573C	#8F6D0C	#8A2F1F

TERRA

One primary action per decision area. Links, active nav, editorial marker. Small text on Paper uses #95450F.

OLIVE

Verified, complete, grounded panels. Pair with a check or label in operational UI.

MUSTARD

Caution and review. Small warning text on Paper uses #795B08.

OXBLOOD

Error, refusal, critical incident. Never used for emphasis or as a level.

Night is warm. Meaning stays fixed.

NIGHT	RAISED	PAPER	SOFT	RULE	TERRA	OLIVE	MUSTARD	OXBLOOD
#181813	#262218	#F4EFE2	#B8B4A2	#48463A	#D2802F	#9AA989	#CFA032	#C96455

01 Paper becomes the text color. Night is the canvas — never a browser invert.

02 Terra lifts to #D2802F so actions stay visible without glare.

03 Oxblood fill stays #C96455. Small danger text on raised night uses #D87969.

04 Rule is decorative only. Control borders use #827C68.

Three families. One reading order.

Besley

The Ten Interviews

Display and headings. Warm, editorial. Never for dense UI labels.

THE AI PLAYBOOK BY CYPRESS COMMAND · ILLUSTRATED EDITION · BRAND KIT · REVISION 2

Ink on paper. Four level inks, nine chapter inks, one risk ink.

The Playbook borrows the Groundwork visual system, not the Cypress Command corporate palette. Cypress Green never appears; the Cypress Command mark is recolored into this palette. Color is never decoration: every colored element answers to a level, a chapter, a plate, or a risk.

CORE PALETTE · DAY

File names: MEMORY.md · USER.md

Table header rule

Context row label in ink

TOC: dot and active marker in ink

One ink per chapter, rotating so neighbours never match. Chapter 8 (the refusals) is the only chapter set in oxblood. The ink drives the chapter numeral, the 28px bar above every sub-heading, list markers, blockquote and table-header rules, table row labels, the wash behind inline file names, and the chapter's dot and active marker in the contents column.

PLATE INKS · FOURTEEN PLATES

PLATE 00 · TERRA Fig. 00 Cover	PLATE 01 · OLIVE Fig. 01 Operating loop	PLATE 02 · FOUR INKS Fig. 02 Level ladder	PLATE 03 · OLIVE Fig. 03 Document map	PLATE 04 · TERRA Fig. 04 Session boot	PLATE 05 · MUSTARD Fig. 05 Memory lifecycle	PLATE 06 · OLIVE Fig. 06 Security gates	PLATE 07 · OLIVE Fig. 07 Runway	PLATE 08 · TERRA Fig. 08 Graduation	PLATE 09 · MUSTARD Fig. 09 Three zones	PLATE 10 · TERRA Fig. 10 Capture	PLATE 11 · OLIVE Fig. 11 Operator loop	PLATE 12 · MUSTARD Fig. 12 Automation	PLATE 13 · MUSTARD Fig. 13 Evidence
--------------------------------------	---	---	---	---	---	---	---------------------------------------	---	--	--	--	---	---

Each plate draws in one ink (currentColor) plus paper, ink, and rule. The plate frame declares its ink with a 3px top rule, the PLATE NN label, the Fig. NN numeral in the caption, and the fill of Expand and Replay on hover. Plate 02, the level ladder, is the exception and uses the four level inks in level order.

WHERE ELSE THE INKS APPEAR

COVER AND FURNITURE

- Cover stats: 10 in terra, 4 in mustard, 15 in olive (rule and numeral), echoing the four level chips beneath.
- Footer opens with the level stripe:

olive, mustard, terra, ink in equal segments.
- Part II hand-off box: terra-deep left rule on paper deep.
- Text selection in terra tint; keyboard focus rings in terra deep.

INTERVIEW CARDS · PART II

- Card head takes a 7% wash of the level ink over paper deep.
- Left rule, card number, level tag, question numerals, bullets, and active tab underline follow the level.
- Build prompt block: ink field with a 3px level-ink top rule.
- Copy prompt confirms in olive deep (the only state color).
- Depth-by-level panel names each level in its own ink.

WHAT STAYS NEUTRAL

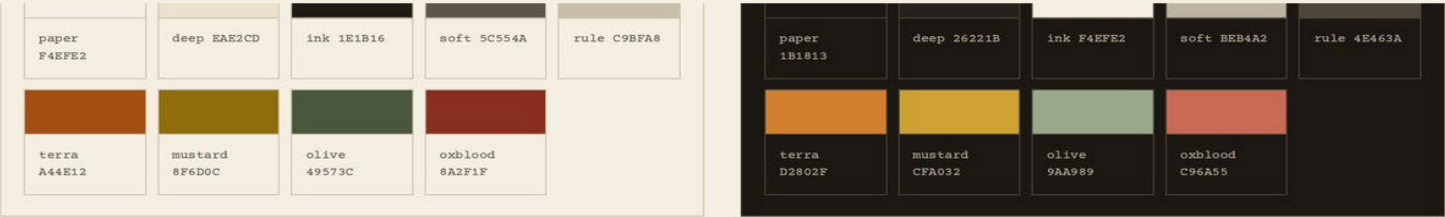

- Body text, hairlines, table cells, and plate strokes remain ink and rule.
- Terra deep is the page-level accent: eyebrows, active nav, links, the byline lockup. Inside a chapter, the chapter ink takes over structural marks.
- Never more than one chapter ink, one plate ink, or one level ink in view at once; oxblood may join any of them as risk.
- Cypress Green never appears.

MARK AND ATTRIBUTION

The Cypress Command mark (rounded C with the square core) and the CYPRESS COMMAND lockup are applied as masks and filled with a palette color: ink in the nav, terra deep in the cover byline, ink in the footer, paper on night surfaces. Never Cypress Green (#1E5036), never on a plate. Attribution reads "The AI Playbook by Cypress Command."

RULES

- Terra deep is the page-level accent: eyebrows, active nav, links, byline lockup, the Part II hand-off. Inside a chapter, structure (numeral, bars, markers, rules, row labels, file-name wash) takes the chapter ink.
- Chapter inks rotate terra, olive, mustard so neighbours never match; oxblood is a chapter ink only for Chapter 8, the refusals.
- Each plate draws in one ink (currentColor) plus paper, ink, and rule, and its frame declares that ink (top rule, label, figure numeral, button hover). Plate 02 is the single exception and uses all four level inks.
- Level color follows the level, not the mood: olive, mustard, terra, ink. A split card shows both tags and takes the full level's color. Olive deep doubles as the single state color (copy confirmed).
- Oxblood is reserved for risk and refusal. It never marks emphasis, importance, or a level.
- Paper deep is a surface, not a color: plates, quotes, card heads, and one full-bleed band. Objects inside the band return to paper.
- No shadows, no rounded corners above 2px. The footer level stripe is hard-edged segments, not a gradient. Hairlines carry structure.
- Light variants (terra #C7681D, mustard #D9A419, olive #5A6B4A) exist as tokens but are unused; tints come from deep tones at 8–16% opacity.
- Night inverts paper and ink and lifts the four inks to the night values above; the hierarchy and roles do not change.

PRACTICAL INTELLIGENCE FOR REAL OPERATIONS

Keep the form coherent.

DO

- 01 Use official SVG masters: cc-v1-horizontal-light / dark and the standalone marks.
- 02 Hold one dominant expression per artifact: Editorial, Technical, Archival, or Digital.
- 03 Pair color with a label, icon, or numeral. Underline links in prose.
- 04 Convert to CMYK only against the printer's profile, then proof on stock.
- 05 Edit tokens, rebuild, proof light and dark, then CHANGELOG.

DON'T

- 01 Do not restore Cypress Green on the mark or in Playbook pages.
- 02 Do not stretch logos or boards to fill a frame. Letterbox instead.
- 03 Do not use Paper as text on strong Mustard, or Rule as an input outline.
- 04 Do not invent metrics, client quotes, or a migrated public website.
- 05 Do not give On The Boulevard or Belle Realty a Cypress color system.

How the kit is used tomorrow morning.
