

# ORANGE OCEAN ATLAS · OTB

OPERATING MANUAL · AUGUST 2026 · **CONFIDENTIAL**

SHEET M-1 · 101-149 ARNOULD BLVD · LAFAYETTE, LA

## Orange Ocean Atlas — Operating Manual (On The Boulevard deployment)

---

**Version August 2026 · covers the 14-sheet production build (340 tests) · CONFIDENTIAL — contains actual rents** Live app: <https://orangeoceanatlas.com> (also [otb-command.vercel.app](https://otb-command.vercel.app)) · Operator: [adam@adamabdalla.com](mailto:adam@adamabdalla.com)

This supersedes the July 2026 text-only edition ( [docs/pitch/operator-manual.md](#) ). Every screenshot in this manual is a real capture of the production system, signed in as the operator, taken August 8, 2026. Part I is orientation, Part II is the operator's day, Part III covers each sheet in depth, Part IV is the counterparty guides (owner / vendor / tenant / signer), Part V is the monthly and periodic rhythms, Part VI is administration and recovery.

---

# Part I — Orientation

## 1.1 Signing in

There are no passwords. Enter your email on the login screen; a **magic link** arrives by email; clicking it signs you in. Your role is resolved automatically:

| YOU ARE...  | HOW THE SYSTEM KNOWS              | YOU LAND ON                         |
|-------------|-----------------------------------|-------------------------------------|
| Operator    | adam@adamabdalla.com              | Everything                          |
| Owner       | pre-authorized email (see §6.1)   | Read-only, operator-chosen sheets   |
| Vendor      | email matches the vendor roster   | V-1 Vendor Portal only              |
| Tenant      | email in the tenant-contacts list | M-1 Maintenance only, own unit      |
| Anyone else | —                                 | A "pending" holding screen; no data |

If a legitimate person lands in pending, the operator promotes them (§6.1).

## 1.2 The drawing-set metaphor

The left sidebar is a **sheet index**, like an architect's drawing set:

- **D-0 Portfolio** — cross-property rollup (one card per property)
- **D-1 Dashboard** — KPIs, action queue, live cards
- **A-1 Site Plan** — the interactive plat
- **A-2 Spatial** — iso / 3D / satellite / photoreal lenses
- **R-1 Rent Roll** · **P-1 Financial** — money
- **C-1 Compliance** · **T-1 Critical Dates** — obligations
- **W-1 Action Board** — kanban of everything needing action
- **K-1 Directory** — contacts, document register, site imagery
- **M-1 Maintenance** — work orders (also the tenant's sheet)
- **S-1 Owner Safe** — sealed document vault
- **AI-1 Concierge** — the three AI personas
- **V-1 Vendor Portal** — vendor roster, COIs, work orders

The URL tracks the open sheet ( `#roll` , `#plan` ...) — the back button walks your history, and links can deep-link a sheet. Boot lands on D-1 (D-0 sits above it in drawing-set order but is a rollup, not the daily surface).

1.3 The unit drawer — the universal detail surface

Term to 2027-02-28

Open

Click any unit anywhere (site plan, rent roll, 3D lens, satellite) and the **drawer** opens with everything about that unit: term progress, PSF economics, HVAC responsibility, notes, contacts, documents, photos, compliance rows, the **Ledger** panel, and the **E-Sign** panel. Most day-to-day work happens here.

## 1.4 Search and shortcuts

- Press / anywhere → omni-search units, contacts, documents; Enter opens the top hit.
- ↓ **SHEET** (topbar) or **Ctrl+P** → prints the open sheet as a stamped PDF (drawing-set footer, date, headline figures). R-1 is guaranteed one page.
- **Export / Import** (topbar) → full state snapshot as JSON; Import restores it. This is your portable backup (§6.4).
- Theme toggle (sidebar foot): plan-room (default) ↔ dark. Print always reverts to paper.

At phone widths the sheet index becomes an off-canvas drawer behind the  $\equiv$  button, grids collapse to one column, and the unit drawer goes full-screen. Everything works; nothing is mobile-only.

---

## Part II — The operator's day

---

A normal day touches five surfaces:

1. **D-1 Dashboard** — scan the KPI row, the live cards, and the Action Queue (§3.2).
2. **W-1 Action Board** — the kanban seeds *itself* from live facts (holdovers, renewal windows  $\leq 12$  months, vacancies, compliance flags, covenant obligations, open work orders). Drag cards between lanes,

dismiss what's handled, add custom cards. You never have to remember to create a card for a lease expiring — it appears on its own.

3. **AI-1 History** — the daily automated scan (11:00 UTC) may have opened a thread: a renewal window entered 180 days, a holdover appeared, occupancy dipped, the camera pipeline went quiet, a voice lead never booked, or a payment arrived that couldn't be matched. Each condition opens exactly **one** thread, ever — if there's nothing new, there's nothing there.
  4. **M-1 Maintenance** — new tenant requests (from the portal or the phone line) appear in the queue. Triage per §3.10.
  5. **Mail/phone → the system** — anything that arrived outside the system (a signed lease, a COI, a check conversation) gets recorded where it belongs the same day: SOT update (§5.3), vendor folder (§3.13), ledger entry (§3.11).
-

# Part III — Sheet-by-sheet instructions

## 3.1 D-0 Portfolio

One card per property you can see: A/R outstanding (sum of positive unit balances over effective ledger entries) and open work orders, with an as-of stamp. "Open →" switches the active property. With a single property the **property switcher** stays hidden; at two or more it appears in the sidebar (see the onboarding manual). Derived — nothing to maintain here.

3.2 D-1 Dashboard

Read-only KPIs derived from live data — nothing to maintain here. Cards: occupancy/rent KPIs, parking variance (from the instruments file, not typed), **Parking Occupancy (C3)** with 7-day trend (48-hour freshness window; the as-of label shows date+time for non-today samples), **Network (UniFi)** up/down, **Automation (cron)** — green with last-run age; brick-red STALE past 26 hours, which matters because maintenance aging, voice leads, C3 heartbeat, UniFi, rent posting, and the owner brief all ride that one daily cron — **Client Errors (24h)** (renders only when the count is nonzero), and the Action Queue (same cards as W-1). If a card shows brick-red, it is telling you something needs attention.

### 3.3 A-1 Site Plan

The recorded plat, interactive. **Chips** toggle overlay layers: - **Lenses:** Status / Expiry / Rent / Use / HVAC / Size — unit fills + legend. - **Parking** — the 314 drawn stalls by zone. - **Cameras** — 17 mounts with view cones; click one → its live view. **Adjust cams** (operator-only): drag pin to move, drag the brass dot to re-aim, double-click to reset; corrections persist. - **Occupancy** — latest measured stall states painted green/outline over the storefront row, Lot 8 pocket, and the 149 corner. - **Pins / + Pin** — drop a pin per water shutoff, meter, bench, column. Pins also appear on the satellite lens. - **Overlay** → **Floor plan** — whole-center floor-plan raster under the unit boxes, with an opacity slider. Click any unit → drawer.

### 3.4 A-2 Spatial (four lenses)

- **Iso** — SVG isometric, real CAD heights; ↑↓ toggles true heights; ↓ SVG exports a standalone file.
- **3D** — orbitable massing; **Mesh** swaps in the photogrammetry mesh.
- **Satellite** — frozen basemap with georeferenced footprints, unit labels, asset pins; opens plan-oriented (Marie Antoinette top).
- **Reality** — photoreal drone splat; toggles unit overlays; click a storefront → drawer. All lenses share the same selection — pick a unit in one, it's selected in all.

COMPLIANCE

Roof: membrane failure (long bldg) - roofer walk

Skydio 2025-10-15: failed membrane on long-bldg RTU 106 (-101-109), open to weather - see docs/roof-condition-brief.md (thermal anomaly RETRACTED - neighbor's roof)

See Part II. Card types include seeded facts (holdover, renewal, vacancy, compliance flag, covenant) and **live work-order cards** (`mr:` prefixed). Overrides (lane moves, dismissals) persist; the seed recomputes every render, so a dismissed card returns only if the underlying fact returns.

WORK ORDERS - 0 OPEN

NEW REQUEST

101 · The Pink Paisley

Routine

What needs fixing?

Details - where, since when, anything the vendor should know

Photos

Submit request

queue is clear

finished (3)

TENANT LOGINS - 0

- **Queue:** every request with status, age, unit, photos.
- **Assign:** pick a vendor from the service roster → the vendor sees it in V-1 immediately.
- **Status flips** and notes are append-only events.
- **Tenant logins:** the roster editor (email ↔ unit) controls who may sign in as a tenant. Add email + unit; they magic-link in like everyone else.
- **File on behalf:** log a phone-in request yourself.
- **Aging alarm:** unassigned requests older than 2 days (1 for emergencies) open a manager thread automatically. Tenant-side view: §4.3.

### 3.11 The Ledger (drawer → Ledger)

- Balance headline + last entries with running balance.
- **Monthly rent charges post themselves** (idempotently) on the 1st, since August 2026.
- **ACH payments post themselves.** Each unit has a reusable Stripe payment link (ACH only; roster with URLs: docs/stripe-payment-links-2026-08.md , copy on Drive). You send the link through your own channel — the app sends nothing. When the payment settles (ACH takes days), the unit's ledger gains an ach:<payment-intent-id> entry automatically. A payment that can't be matched to a unit, or that fails, opens a manager thread in AI-1 ( ach-unmapped: / ach-fail: ) instead of landing silently.

- **"Payment received"** records an out-of-band payment by hand.
- Add charge / credit / adjustment / NSF / write-off as needed.
- **Void** = ✕ on an entry → creates a *reversing entry* (nothing is deleted).
- **Late-fee chips:** past the 5-day grace, a suggestion chip appears (\$100 + \$25/day, the standard schedule). It posts **only when you confirm**. If a lease carries different late terms, flag it — policy goes per-unit.
- **Amount changes:** re-run `tools/stripe-payment-links.mjs` for that unit and retire the old link in the Stripe dashboard.

### 3.12 The E-Sign panel (drawer → E-Sign)

1. **Create** a request (optionally attach a document for review).
2. **Copy link / Copy message** — the app sends nothing; you deliver the link through your own channel (text/email). This is deliberate.
3. The signer opens a plain, branded page — no login needed — reviews, and signs or declines (E-SIGN/LA-UETA consent language included).
4. You see the live status (sent → viewed → signed/declined/expired), can **re-token** (invalidate + reissue) or **cancel**, and get a signed receipt. Tokens are single-lifecycle: double-signing or declining after signing is rejected by the database itself.

### 3.16 AI-1 Agent Desk

Three personas — 🏢 **Concierge** (property Q&A), 🍷 **Leasing**, 🛠️ **Property Manager** — all grounded in the property dossier + live state. - Conversations persist and resume after reload; 📖 **History** reopens any thread; + **New** starts fresh. - 🗣️ mic input and 🔊 spoken replies (Chrome/Edge). - **Numbers are guardrailed:** once a calculation is involved, every figure in the reply must trace to the deterministic engines or the reply is replaced with the engines' own summary. Ask the leasing agent things like "compare retaining at \$17 vs replacing at \$20 with 3 months free and \$10 TI, 5-yr term, 1,917 SF, 7.5% cap" — or the manager "should I spend \$45K on an RTU replacement with a \$120K reserve, \$30K/yr contributions, installed 2008, 15-yr life?" - 📄 **Briefs** — the monthly owner-brief archive; Open 🔒 renders any month. - 📦 **Lead SMS** (leasing persona): copies a ready-to-send text with the public leasing one-pager (orangeoceanatlas.com/leasing.html) and the leasing line number. You paste and send it — the app sends nothing. - **Lease packages (operator-only):** ask 🍷 Leasing to assemble a proposal; it collects terms conversationally, then generates a branded DRAFT proposal (and optionally the internal owner summary) as a card with **Open** 🔒 and ✉️ **Email** (pre-filled mailto — you send it; it never auto-sends). Every generated document is DRAFT-stamped, subject to legal review.

### 3.17 The voice lines (LIVE)

- **Tenant line (337) 273-0384:** 24/7; triages per the SOP (emergencies = leak / electrical / break-in / sewer → dispatch + notify after-hours, never wakes you for permission); files real work orders into M-

1; never discusses eviction timelines.

- **Leasing line (337) 270-7044:** takes name + number, quotes "high-teens PSF" range only, screens against exclusive-use conflicts, books tour slots (18h lead, Tue/Thu defaults; double-booking is impossible). **Truthful booking is enforced:** the agent cannot claim a tour is booked unless the booking tool actually succeeded; an unbacked claim is corrected or replaced with an honest fallback, and a leasing call that ends without a booking opens a `voice-lead:` manager thread within hours so no lead drops.
  - Every call lands as a transcript thread in AI-1 History.
  - Go-live steps + secret rotation drill: `docs/a3-voice-runbook.md` .
- 

## Part IV — Counterparty guides

---

### 4.1 Owners

Sign in with your authorized email. You see the sheets the operator has shared (dashboard, rent roll, financials, and the Safe are typical), **read-only**. The  **Briefs** panel in AI-1 holds your monthly intelligence brief — every figure deterministic, archived permanently. You may ask the AI desk questions; its numbers are guardrailed the same as the operator's.

### 4.2 Vendors

Magic-link in with the email the operator has on file. You see one sheet: your own folder (your documents + "send a file to management"), your COI status with a renewal nudge, and **your assigned work orders** — open each to read notes and photos, add notes, and ✓ **Mark complete** when done.

### 4.3 Tenants

Magic-link in with the email your management added. You see M-1 for **your unit only**: file a maintenance request (describe the problem, attach photos), watch its status, and **"Your account"** — your current balance and recent ledger entries. Rent is paid through the payment link management sends you — one link per unit, reusable every month. Emergencies (water leak, electrical hazard, break-in, sewer): call the maintenance line rather than filing a ticket.

### 4.4 Document signers

You'll receive a link from management. It opens a simple page — no account, no app. Review the request (and the attached document if one is linked), then sign or decline. The signature is recorded with timestamp and consent language under the federal E-SIGN Act and Louisiana UETA.

---

# Part V — Rhythms

---

## 5.1 Daily (mostly automatic)

- 11:00 UTC — proactive scan: renewals/holdovers/occupancy → AI threads; work-order aging; camera-pipeline heartbeat; rent-charge posting; unmatched-ACH threads; unbooked voice leads; UniFi outages. The scan also stamps the **Automation (cron)** card on D-1 — if that card goes brick, every one of those safety nets is silent; treat it as urgent.
- 12:00 local + 23:45 local — camera frames classified + uploaded (hands-free; the sampler is watchdog-healed).
- You: the Part II walk — dashboard, board, AI history, maintenance queue.

## 5.2 Monthly

- **1st:** Owner Intelligence Brief generates itself; rent charges post themselves. Skim the brief before the owner does.
- Send (or re-send) payment links through your channel; ACH payments post themselves as they settle; confirm or dismiss late-fee chips after the grace window.
- Documented property walk (per SOP); update C-1 flags as found — the history logs itself.

## 5.3 When a lease is signed / a fact changes (governed SOT update)

1. Update the source pack `docs/sot-2026-07/` (authority rank 1).
2. Apply the change to `src/data/units.json`.
3. `npm run split-seed && npm run concierge-context` (the test suite fails if you forget — deliberately).
4. `npm test` → commit → deploy (§6.3) → verify live. Never trust an imported system's dates over signed paper; store stated-rent exceptions as exceptions — do not "fix" them to formula.

## 5.4 Periodic

- COI badges: chase at  $\leq 60$  days, escalate at  $\leq 30$  (§3.13).
  - Semi-annual house HVAC PM (unit 149 excluded — tenant maintains under \$9.01 with Butcher Air).
  - Move-out: solo walk + photos within 30 days; file to the unit's assets.
  - Re-run marketing artifacts when availability changes ( `npm run poster` , leasing one-pager per `tools/leasing-package.py` ).
-

## Part VI — Administration & recovery

---

### 6.1 Granting and revoking access

- **Owner:** sidebar → "Sign-in access..." → type email → + **Owner**. Their first magic link lands them as owner. Anyone stuck in pending is listed there with one-click "make owner". Revoke = ✕ (removes pre-authorization; demoting an existing profile is a Supabase console step).
- **Vendor:** ensure their email is on the roster; tell them to sign in.
- **Tenant:** M-1 → Tenant logins → add email + unit. Remove the row to cut access.
- **Owner sheet visibility:** the "Owners can see..." panel controls which sheets owners get.

### 6.2 Quality gates (never skip)

`node --check` on changed modules · `npm test` (340) · `npm run build` · deploy · **grep the prod bundle for the change** · smoke the live URL. Committing is not shipping: **commits do not auto-deploy**.

### 6.3 Deploying

```
npx vercel deploy --prod --yes --scope adams-projects-0c52918e
```

(CLI is logged in as orangeonyx on this machine. `.vercelignore` governs uploads — the 16MB splat + 3MB mesh ride in `public/`.)

### 6.4 Backup & portability

- Topbar **Export** → full-state JSON. Take one before risky edits; **Import** restores.
- The repo is the authoritative system; all exports (dossier, buyer set, posters) are disposable and regenerable. Every export also lands on `G:\My Drive\00 OTB\`.
- A scheduled task ( `OTB-Repo-Backup` , daily 03:00) bundles full git history to Drive. Committed-only — commit anything that matters.
- Local preview without login: dev server on port **5199**; move `.env` aside temporarily — and restore it after. (Confidential rents do not render in that mode — by design.)

### 6.5 Secrets

Keys live **only** in Vercel env — never in chat, repo, or disk. Rotations are scripted drills: `tools/rotate-secret.mjs` (shared cron secret), `tools/rotate-voice-secret.mjs` (voice). One-shot key needs (e.g. the restricted Stripe key used to mint payment links) follow the drop-use-delete drill: key to a dotfile, tool consumes it, file deleted — never in chat. Vercel rejects env values with trailing whitespace at deploy

time — the scripts handle this; when feeding a secret to a CLI, use `cmd /c "... < file"` (PowerShell pipes append a newline).

## 6.6 The camera (C3) pipeline

Fully hands-free: sampler (5-min ticks, watchdog task self-heals it at logon + every 5 min) → midday 12:00 + nightly 23:45 classify + upload → app surfaces. If it goes quiet 36 hours, a manager thread opens on its own. After a machine reboot the watchdog relaunches the sampler; no manual step. Known conventions: capture day-directories are UTC-keyed; frames live outside the repo.

## 6.7 Known limits (deliberate vl boundaries)

- E-sign, lease proposals, and payment links: the operator transmits links/documents; the app sends nothing outbound on its own.
- Voice: no SMS notify on dispatch, no live call transfer, no daily call cap (set a Twilio usage trigger); settings edits via SQL until a UI lands.
- Desktop-first; the phone experience is a responsive web app, not a native app.
- Onboarding a second property is operator-driven (see the onboarding manual); there is no self-serve signup.

---

*Questions the manual doesn't answer: ask the 🏠 Concierge — it is grounded in the same governed data this manual describes.*
